

Microlon[®]

The best thing you can do for your bike's engine.

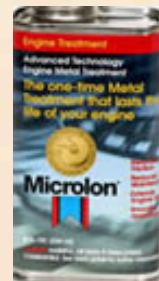

*Winners like Rich Schlachter have
proven it on the race track.*

*1979 U.S. Road Race Champion
1980 U.S. Road Race Champion*

* test data on file

**The Permanent
Friction Fighter**

Over 40 years and still racing!!

Microlon is an exciting breakthrough in lubrication technology. It reduces friction. Virtually eliminates engine wear. Increases overall performance in engines – new and old.

Microlon is a permanent, one-time metal treatment. Not an additive. What you can expect after a Microlon treatment is a faster, more efficient bike with more **HORSEPOWER** and **TORQUE**.

Visit www.microlonproducts.com/motorcycle_products.php to review our recent Dyno test performed on a 600cc motorcycle engine.
